---

I've played a number of these text adventure games, and not just from Hosted. They've been somewhat of a passion of mine; the idea of controlling a story is a great one, and a text based game allows for more depth in every choice whereas other games may not. That being said, Tin Star is one of the greatest "choose your own adventure" games I have ever played. The claim that this game has over a million words sounds like there will be long, boring paragraphs of unnecessary flavor text, but that's not the case at all. Sure, the game can be long winded, but only when describing an important scene. Words aren't thrown about carelessly and are used to craft the experience at nearly every turn. This game is long in the best way, always dropping new and intriguing characters and challenges for you to overcome as the Marshal of Lander County. It's great, and don't let that long word count put you off. There is a lot of GREAT content to be had here. That said, the story itself is stellar. Without spoiling much, you are the new Federal Marshal of Lander County, a wild western place out around Nevada. You will face a multitude of interesting problems, facing off with interesting villains, making great friends, battling the elements, and truly role-playing your own character. I'm serious when I say this is a true RPG. You create your own backstory and name; they don't make you play as a pre-existing character like some of them. You can be as mean or kind as you want, as persuasive, intimidating, or deceptive as you want. You can use your head, friends, or just your guns to overcome your problems. You have stats to level that affect things, hundreds of choices, big and small, that affect who you are, how people think about you, and how the world changes. I have NEVER seen this much freedom in one of these games. Sure, the progression of the story is linear, as you will always face the same setpieces in the same order, but you have so much freedom when it comes to tackling everything. I mean, when dealing with potentially dangerous situations, you almost always have the option to just say "u2665u2665u2665u2665it" and pull your pistol and start shooting. You could talk everyone down, or try to, but why do that when your choice of four or five pistols is hanging on your hip? Hell, I'm fairly certain you can kill half the named characters in the game by just shooting them when you first meet, and I'm not talking about the bad guys! I can't recommend Tin Star enough if you are a fan of these games, and if you aren't a fan, this will make you one. Go play it, and become the sheriff you want to be. It's awesome.. This is one of the few reviews I've actually written. Tin Star is superbly written, emotionally engaging, and demands the player consider his actions accordingly due to the severe consequences of going "Rambo". I deeply enjoyed playing this interactive storytelling game. If you're sick of flat, two dimensional characters from the triple A series, give this a whirl.. Regardless of the fact of how many words this game boasts or how many times you can replay it, this game is not SIMPLY a game, it is a story, a novel with the aspects of a game, and it was and is beautiful every time you play through it, because you begin to become your character and embrace them, they stop reflecting you and you start reflecting them. Basically, buy the game, it's super amazing.. Firstly I would like to note that I stumbled upon this Game out of chance from pure boredom seeking a new game worthy of a dollar or two, Tin Star blew my mind and exceeds all expectations promised by the developer, not only did Tin Star keep me on my toes it made me second guess my decisions and discuss my last chapter to my partner long after I completed said Chapter, Tin Star invigorates your imagination and allows you to fully immerse yourself in an 1866? World. I support Special Needs Kids and I have given the rights to a few children who don't particularly enjoy reading, with a little assistance they as I do love the book and the story that begins to unfold by the thought of your decisions. I know I am rambling never the less I love this Tec Based Game 10 Polished Tin Stars out of 10 Dead Raiders.. In Tin Star, you play a US Marshal, presumably occupied with Honor, Law, and Order (there are stats for each category). My primary complaint about the game is that it offers too much individual freedom, to the point of departing from its premise. What kind of Marshal blows up dams, robs wagons and shoots people under no provocation? While many scenarios have diplomatic solutions, violence is usually only a last resort. In other words, I think the story might have been more convincing if the player had other careers to choose from, as opposed to being made a Marshal by default. That being said, any fan of RPGs should welcome Tin Star. It's constructed like a massive Western D&D campaign and is both one of the longest and most interactive titles by Choice of Games. The challenges it offers are numerous and inventive, avoiding the grindy repetition typical of the RPG genre.. I loved this CYOA story. The characters felt real, the plots were interesting and in depth and didn't feel like a bunch of tropes. I felt like I had choice in the game, and that my personality was truly up to me. I felt heartwarmed at points and when it ended I even felt a little sad to say goodbye to the characters and their stories. Also has a mouse you can keep as a pet.. I've played it for a few hours, and I have to say it's interesting, to say the least. For three dollars you're buying a western book, where you the protagonist, play as U.S. Marshal. All and all it is an entertaining book/game.. Very interesting Choose Your Own Adventure game. If you liked any other games from the "Choice of.." series and not sure if this game is for you, you should most certainly buy it. The atmosphere of Wild West is strong with this one. If you wanted to find out how it feels like to be a marshal in 1860's with fairly vast freedom of choice I recommend this game for you, especially for this kind of price.. An interesting choose-your-adventure book. It was a good read and I felt rather immersed. It is worth the low price tag.
